

*Cleaning Equipment  
for large size panel*

## ***SELD-Cleaner Series***

*Our series enable continuous cleaning of large panel !*

### **Equipment overview**

**This Equipment is Sheet Cleaner for cleaning soot de-bonded by LASER, and residual resin**

### **Feature**

**Applicable to large size panel**

Panel size : Up to 600mm x 600mm

**High throughput**

Continuous operations can make the manufacturing process highly efficient.

**Compatible with solvent cleaning**

Solvent cleaning in exhaust system, fire extinguishing system or waste liquid system etc.

**Cleaning liquid recycling**

Recycling the solvent by filtering residue in it after cleaning.  
Eco-friendly and economical.

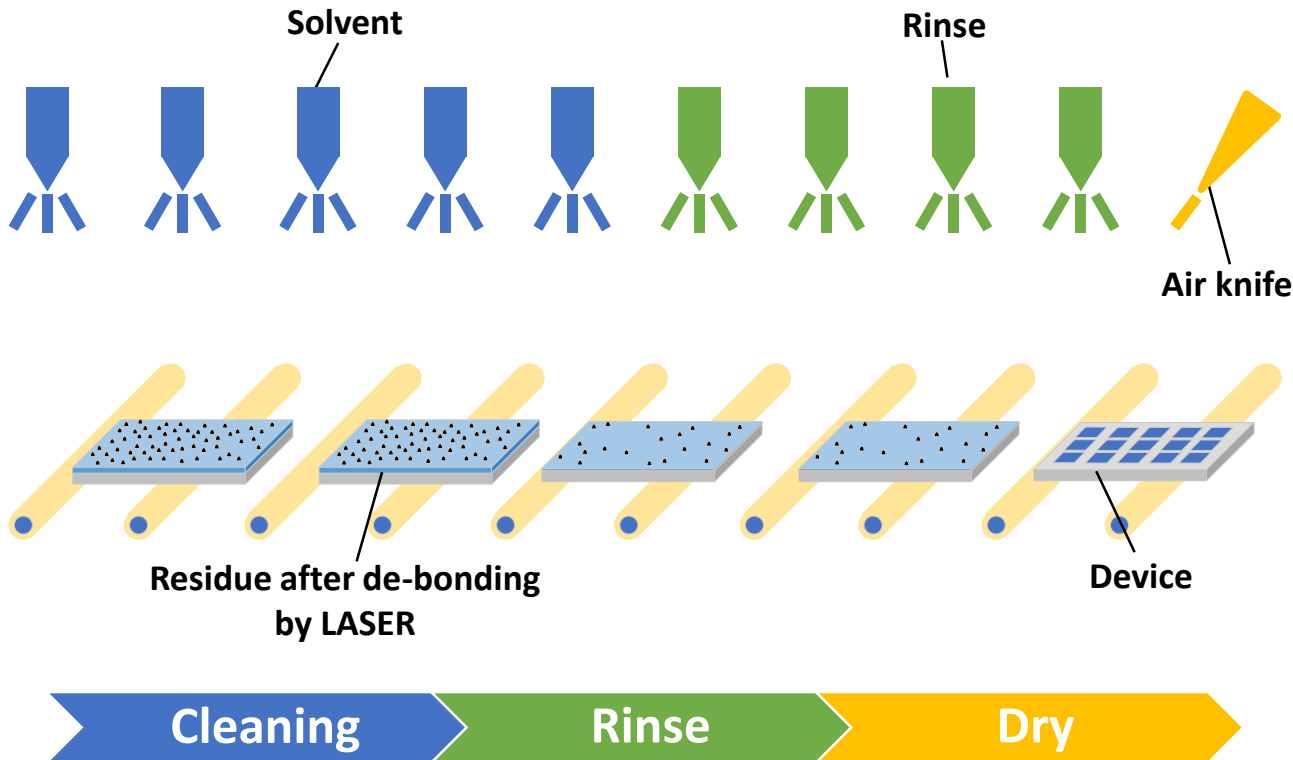

**Applicable to various standards**

Applicable to various standards such as SEMI-S2, UL standard.  
Please ask us for other standards.

**Customizing**

We can customize footprint, equipment specifications, etc. on a customer's request.

## Cleaning flow(Model case)

## Specifications

|                     |   |
|---------------------|---|
| Basic configuration | Cleaning chamber、Rinse chamber、Dry chamber、Filter system、Recycle system for cleaning solution |
| Cleaning method     | Shower cleaning、Dip cleaning  |
| Transfer method     | Conveyor transfer   |
